

BBQ SAFETY

CAMPSITE - BRANDS HATCH 19-23 JULY 2018

Due to the recent spell of hot weather, ground conditions on the campsite are extremely dry. Therefore, please ensure you take extra precautions when using a BBQ this weekend.

- All BBQs must be raised off the ground
- **Never leave a hot stove or barbecue unattended. Ensure your BBQ is fully extinguished before you leave it.**
- Please distribute sand in the area immediately underneath your BBQ. Sand and scoops will be provided at the service points around the campsite

If possible, please also wet the area surrounding your BBQ

Our fire marshals will have both sand and water on-board their vehicles and will be able to help with this before you start cooking

- Keep roadways and fire lanes clear at all times
- Fire extinguishers are located at various fire points around the campsite. Use only in an emergency and raise the alarm immediately
